

Band- and plate heating elements

For heating of moulds, tools, nozzles and machines. These heating elements, mica- or ceramically insulated, are manufactured as to specifications in all shapes. The heating elements can be delivered with different kinds of connection, holes for temperature sensors.

Ceramic heaters:

Dimension:

Min. diameter 65 mm

Min. width 35 mm

Temperature/effect:

Maks. temp. 600° C

Heating power 7W/cm²

Power:

As required

Mica Barrel heaters:

Dimension:

Min. diameter 70 mm

Min. width 25 mm

Temperature/effect:

Maks. temp. 300° C

Heating power 3,5W/cm²

Power:

As required

Plate heating elements Mica-insulated:

Dimension:

Individual solutions

Temperature/effect:

Maks. temp. 300° C

Heating power 3W/cm²

Plate heating elements Mica-insulated:

Dimension:

Individual solutions

Temperature/effect:

Maks. temp. 300° C

Heating power 3W/cm²
