

Floor heating mats

Lots of Railway vehicles have problems during winter time or in the countries with low temperature. In coach entrance vestibules a build-up of snow and ice is a source of risk for passengers as the floor becomes slippery. Polyester and silicone heating mats from Cato-Tech A/S fitted in the floor eliminate this danger while also improving comfort for those passengers traveling in the vestibule.

TECHNICAL CHARACTERISTICS :

- Takes up minimum space
- Highly flexible
- A variety of shapes
- Quick and easy to fit
- Any voltage on request
