

## Wall heating mats

Transport industries, including vehicles and trains, experience operating issues due to low temperatures during cold winter season.

Polyester and silicone heating mats from Cato-Tech A/S, which can be fitted on the wall, eliminate danger of freezing. It will also provide higher comfort levels for passengers traveling in the vestibule. To heat the walls, heating mats can be placed under the windows. This will also help with demisting the windows.

### TECHNICAL CHARACTERISTICS :

- Takes up minimum space
- Highly flexible
- A variety of shapes
- Quick and easy to fit
- Any voltage on request
